

Vortex Unit

The Vortex is great value and can be used in compact locations.

- 3m x 3m space where a smell solution is required.
- Low initial cost.
- Use with the extensive range of approved Siga Creative FX aromas.

Benefits

- Economical to run. Takes less power than a 20w light bulb.
- Approx .16p per day for deodorising and approx .22p per day for themed aromas.
- Easy installation. One screw into wall, fill with aroma, plug in and go.

Features

- Well designed (aluminium body)
- Low maintenance
- Proven reliability
- Easy wipe clean

Technical information

- Dimensions (approx.) Height: 17cm, Width 10cm, Depth 150cm
- On/off indicator light
- 230 V / 50 Hz / 16 W
- Manufactured in the UK
- Supplied with aluminium beaker
- Mounting hole supplied (fit using wall screw)

User instructions for the Vortex Unit

A guide to obtain maximum effectiveness

- Always empty - never "top up" the oil as it will weaken it. Empty old oil, wipe, then refill the cup.
- Always keep the unit and cup clean especially under the cup.
- NEVER pour oil into the well always use the cup.
- Fill to 2/3 full. Never over or under fill.
- Ideal height - no more than 6ft (180cm) maximum.
- Positioning of unit - good airflow increases effectiveness eg. doors where people are constantly passing.
- Keep oil away from polished and painted surfaces, the oil may harm them.
- Keep out of reach of children - the oils are not to be ingested.
